'Women as Agents of Change' is the theme for Commonwealth Day 14 March 2011. To celebrate Commonwealth Day 2011, the Commonwealth is asking for nominations of women who have made a difference to the lives of others. The nominations will be judged to find the Commonwealth's most inspiring 'agents of change' who will be featured in a publication to be presented to the Queen, Commonwealth Heads of Government and Commonwealth Foreign Ministers in Perth, Australia 28-30 October 2011.

The contest ends on 14 March 2011. Nominations, rules and criteria can be made using the online form available from:

eNews Vol.4 Issue 2 February 2011

The Royal Commonwealth Society has launched a new project to create a Commonwealth Jubilee Time Capsule. People of any age across the Commonwealth are being invited to contribute memories from the last sixty years either stories, photographs or films. The best entries - one for each of the 21,915 days which make up the last sixty years - will be sealed into the capsule and presented to the Queen as a gift from the Commonwealth family to celebrate her Jubilee celebrations in 2012. The entries not chosen for the capsule will remain online as an important resource for students, teachers, historians and academics.

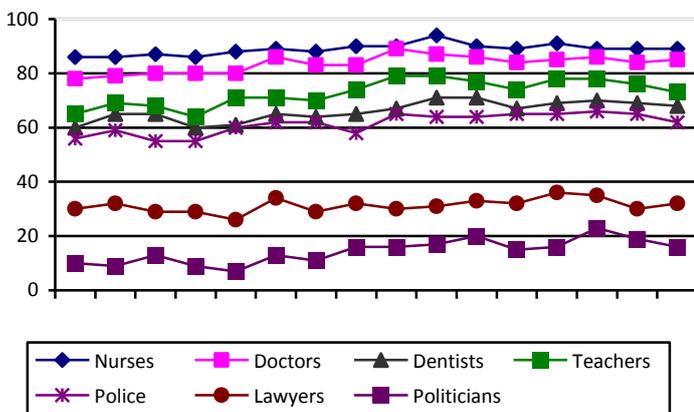

You can participate by submitting your own entry - all you need to do is pick a day that is important to you from the last sixty years and say why that day is important. For more information visit: <http://jubileetimecapsule.org>.

RAMPHAL COMMISSION ON MIGRATION AND DEVELOPMENT

The Ramphal Commission on Migration and Development met recently in Kingston Jamaica to consider their second report which covers the effect of climate change on migration and the impact on developing countries of the migration of skilled workers. The first report of the Commission is available on the Ramphal Centre website- <http://www.ramphalcentre.org>. The second report will be released in the near future. The Commission would like to see migration as a priority issue for the Commonwealth so the positive aspects of migration can be promoted and the potentially negative aspects managed appropriately.
