- Key Quad Plus members
- Midwifery Association Chief executive- Sis Tachawit

ARC Project Context

- Name of Facilities Black★Lion Hospital, Zewditu Memorial, and Alert Hospital
- National HIV prevalence rate- Adult 2.1%
- National ART coverage – 46 – 48 %
- # of nurses – national 60,000
- # of midwives – National 12,000

ARC Project Summary

Overarching Goal	AIM Statement	Project Intervention
<p>To improve the quality of maternity and Pediatric Health Services through Compassionate, and Respectful Care approach in the selected three Hospitals of Addis Ababa.</p>	<ul style="list-style-type: none"> • Increase the competence of nurses and midwives on CRC from 50% to 80% at Black Lion, Zewditu and Alert Hospitals, by May 2017. • Improve the service satisfaction of patients attending in the three identified hospitals through the CRC approach from 40% to 70% by June, 2017. <p>Metric (list 1-2 project indicators):</p> <ul style="list-style-type: none"> • From pretest and post test mean results • Qualitative communication skill <p>ACHIEVEMENT (actual): Increase from 40% to 70% by May, 2017.</p>	<ul style="list-style-type: none"> • Six days on facility assessment survey which is finished. • Manual preparation and distribution. • Systematic and organized training • Supportive supervision by Quad members

Key Activities/Intervention

1. Recruitment of 6 mentors
2. Training of 80 nurses and midwives on CRC.
3. Manual preparation and distribution.
4. Systematic and organized training
5. Supportive supervision by Quad members

Output Indicator Matrix

Describe your monitoring activities

Output Indicator	Frequency of monitoring	Comments – How was the experience?
Percentile increase from pretest and posttest scores.	Before delivery of the training and at the end of the training	All of the participants were not on time during the pretest. Difficult to finish within the limited time on pretest.
Increase on communication skill	During the training session and during presentation as well as on discussion sessions	For the first day there was a fear and anxiety and were not active to respond. With probes and prompts as well as with active participation and group work communication started to be improved.
Satisfaction of participants with the given training and strategy of the training.	On daily evaluation report as well as at the end of training. Informal discussion during break time and mentors observation	Daily evaluation land end of evaluation feedback and informal discussion with the facilitators helped a lot

Outcome Indicator Matrix

Describe the impact of activities

Outcome Indicator	Impact – What is the significance of the change?
<p>Increased percentile score from pretest and posttest.</p>	<ul style="list-style-type: none"> • Produce better practitioners at different levels of the health system. • Improve quality health care services • Improves health outcomes • Fewer malpractice claims. • Reduced health care expenditure • Increases the pool of trainers in a school, and as mentors.
<p>Active participation during communication process.</p>	<ul style="list-style-type: none"> • Increased patient satisfaction • Better adherence to treatment and recommendations. • Influences in a positive way the attitudes of health care providers towards compassionate respectful and caring services. • To equip health care providers with required skills to provide ethical, respectful and

Result

Number of Participants =80

30 (60%) – were from Black – Lion

25 (20%)- were from Alert

25 (20 %) – were from Zewditu

Pretest Average result- 40%

Post test Average Result- 70%

**Analysis- Pretest was not to the expected goal (50%)
as the contents were new to the trainees .**

**Post test – Not to the expected goal as 3 days training
was not adequate from the participants viewpoint.**

**Trainers had no experience on CPR again from
participants viewpoint.**

Lessons Learned

- Training of CPR
- which is the burning issue by the EFMOH and being the beginners in the dissemination of such knowledge to nurses and midwives. (proud)
- Development and implementing in-service training
- Identification of the problem and analysis of the project.(top 2 lessons learned in implementation)
- Development and implementing a project.
- Monitoring and evaluation of project.(2 capacities developed this year)
- Not implemented the 2nd objective and we need to work shortly.

Way Forward

How will you build on what you've learned this year? New partners?

- We need to work more with the EFMOH as we have developed competence on the project.

Share 2 dissemination targets to present your results.

- Ethiopian Federal Ministry of Health as well as to nursing and midwifery association journals and annual conferences.

How will the quad remain in contact?

- Through e-mail, mobile, as well as through associations

Share 1 advice to ARC Faculty on how to improve future support.

- Search project fund and keep up contact frequently through e-mail.
