

# TANZANIA TEAM

Tanzania  
LARC - CMM:

Project: Results Reporting

Status: Stage I

- No process in place for ensuring results are documented in patient chart and conveyed to the patients so results often not received by clinician

However:  
Policy and procedures are established [stage II]

# CMM

- Our project focus on Result reporting
- Current we are at Stage I
- Because: There is no process in place for ensuring results are documented in patient chart and conveyed to the patient  
( Results often not received by clinician)
- However policy and procedures are established(Ideally stage III)

# Result reporting- Flow diagram

## Lab results sent to CTC

- Received from central lab
- Register in VL-logbook
- Check if all results received
- Phlebotomist deliver results to CTC

## CTC Nurse receive result and sign

- CTC nurse check and verify results
- Identify respective patients file

CTC Nurse file results  
in patients chart/ CTC-2

SORT-Results

Is VL  $\geq$  1K  
CPM

NEXT- VISIT

Register patient in High VL- logbook

- Trace patient
- Provide EAC

# Way forward

- **Conduct assessment to the selected sites**
- **Analyze the data and work on assessment findings**
- **Intervene as per findings and recommendations**

Asante sana
